

HabitSight

Usage Access Setup Guide

Step-by-step guidance for enabling Android Usage Access on major Android devices.

No data leaves your device
100% on-device · No account required · Privacy-conscious design

Why This Permission Matters

HabitSight uses Android Usage Access permission to generate on-device digital behavior insights, screen time summaries, and app activity analytics. All analysis is processed locally on your device. HabitSight does not require an account and does not upload personal usage data to external servers.

Universal Setup Flow

Settings → Apps & Permissions → Special Access → Usage Access → Enable HabitSight

Device-Specific Instructions

Brand	Settings Path
Samsung (One UI)	Settings → Apps → Special access → Usage data access
Google Pixel	Settings → Apps → Special app access → Usage access
Xiaomi / Redmi / POCO	Settings → Privacy Protection → Special permissions → Usage access
OnePlus / Oppo / Realme	Settings → Apps → Special app access → Usage access
Vivo	Settings → Apps → Special app access → Usage access

Brand	Settings Path
Motorola	Settings → Apps → Special app access → Usage access
Nothing OS	Settings → Apps → Special app access → Usage access
Huawei	Settings → Apps → Special access → Usage access
Sony Xperia	Settings → Apps & notifications → Advanced → Special app access → Usage access
Asus ROG / Zenfone	Settings → Apps & notifications → Special app access → Usage access

Important Notes

- Android settings may vary depending on device model, Android version, and manufacturer customisations.
- If you cannot locate Usage Access settings, search for “Usage access” using your device Settings search feature.
- Some devices may delay the first insight refresh for several minutes after permission is enabled.
- Certain OEM battery optimisation systems may temporarily restrict background refresh activity.

Troubleshooting

Issue	Suggested Fix
HabitSight shows no data	Close and reopen HabitSight after enabling Usage Access permission.
Insights stop refreshing	Some OEM battery optimisation systems may restrict background activity. Adjust battery settings if required.
Cannot find Usage Access	Search for “Usage access” in your Android Settings search bar.

Issue	Suggested Fix
Permission enabled but no insights appear	Wait 10-15 minutes for the first insight refresh cycle to complete.

Privacy & Security Promise

No account required · No cloud sync · No tracking · All analysis remains on-device
