

HabitSight Privacy Policy

Last updated: May 25, 2026

1. About HabitSight

HabitSight is a digital wellbeing and behavior insights application created and maintained under the Latenora brand. This Privacy Policy explains how HabitSight handles data when you use the app.

2. Privacy Philosophy

HabitSight is designed with a local-first processing architecture. The app does not require account creation, does not use cloud synchronization, and does not send app usage data to external servers.

3. Legal Basis (GDPR)

For users in the EU/EEA, HabitSight processes data only as required to provide core functionality and user-requested insights. Optional permissions operate under user consent and may be revoked through Android system settings.

4. Data Processed by HabitSight

HabitSight uses Android Usage Access permission to process app usage duration, session timing, app/category summaries, and informational insight calculations generated locally on the device.

5. Data HabitSight Does NOT Access

HabitSight does not access personal messages, photos, contacts, files, browsing content, precise location data, or sensitive personal content.

6. No Sensitive Personal Data

HabitSight does not process sensitive personal data such as health information, biometrics, political opinions, religious beliefs, or other GDPR special-category data.

7. No Third-Party SDKs or Advertising

HabitSight does not use advertising SDKs, analytics SDKs, tracking libraries, or behavioral profiling systems. No usage data is sold, shared, or transferred to third parties.

8. Cookies and Tracking Technologies

Latenora websites currently operate without advertising cookies, invasive behavioral profiling technologies, or third-party tracking systems. If analytics or advertising technologies are introduced in future website versions, this policy will be updated accordingly.

9. No Account or Cloud Synchronization

HabitSight does not require account creation, login systems, backend servers, or cloud synchronization services.

10. Usage Access Permission

HabitSight requires Android Usage Access permission to generate informational usage insights inside the app. This permission is not used to monitor private messages, browsing activity, or app content.

11. Automated Insights

HabitSight uses automated calculations to generate informational insight scores related to focus, efficiency, and digital behavior patterns. These insights are informational only and are not medical, psychological, legal, or financial advice.

12. User Control & GDPR Rights

Users may disable supported insight features through app settings and may revoke permissions through Android system settings. Since data remains local to the device, users may directly manage or remove app data using built-in deletion tools.

13. Data Retention

HabitSight data remains stored locally on the device until removed by the user. HabitSight does not externally back up or upload app usage data.

14. Data Deletion

Users may delete HabitSight data through the in-app Purge All Data feature or by uninstalling the app. Android system-level usage statistics managed by the operating system may remain outside the app.

15. Children's Privacy

HabitSight is not intended for children under 13 years of age.

16. Security

HabitSight relies on Android sandboxing protections and local device security systems. Users are encouraged to secure their devices using screen locks and system security features.

17. International Data Transfers

HabitSight does not transfer app usage data to external servers or international processing systems.

18. Changes to This Policy

This Privacy Policy may be updated to reflect legal requirements, product improvements, or Play Store policy changes. The latest revision date will always appear at the top of the policy.

19. Support Communications

When users contact Latenora through support or privacy email addresses, Latenora receives the email address and information voluntarily provided in the message solely to respond to inquiries.

20. Contact
